

CM LIQUID MAG 4%

A Formulation for the Correction of Magnesium Deficiencies in Crops

GENERAL INFORMATION

CM LIQUID MAG 4% is formulated for field, vegetable, row, fruit, tree, vine, ornamental and turf crops.

CM LIQUID MAG 4% may be applied through drip systems, aircraft, or by ground sprayers (high-volume or low-volume).

CM LIQUID MAG 4% may be applied alone or with fertilizers or pesticides. It can be applied either to the plant foliage or to the soil.

CM LIQUID MAG 4% is compatible with most pesticides and fertilizers. However, a compatibility test is recommended if the desired combination has not been used in the past.

SHAKE WELL BEFORE USING

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal. Follow proper procedures for the disposal of spray solutions. Rinse and dispose of empty container according to approved local practices.

CONDITIONS OF SALE

Seller warrants that this product conforms to its chemical description and is reasonably fit for the purpose stated on the label when used in accordance with directions under normal conditions of use. Weather, crop conditions, timing and methods of applications, mixtures with other chemicals not specifically recommended and other influencing factors in the use of this product are beyond the control of the seller. Buyer assumes all risks of use, storage or handling of this material not in strict accordance with directions given herewith.

Information regarding contents and levels of metals in this product is available by calling (800) 355-4457.

DIRECTIONS FOR USE

Always add this product to spray tank before adding a pesticide.
Add to water or nitrogen before adding phosphate material.

RATES FOR ALL CROPS

Foliar Application:

Apply 2 to 4 quarts/ acre as needed on a 10- 14 day schedule.

When rates of over 2 quarts are required, split applications are recommended.

Avoid foliar applications of CM LIQUID MAG 4% when plants are under stress due to lack of moisture.

Soil Application:

For fertilizer maintenance apply 1-3 quarts per acre

For mild deficiency apply 2-6 quarts per acre

For high deficiency apply 1 - 3 gals per acre.

Aerial Application:

Apply 1 quart of this product per 5 to 10 gallons of water per acre.

Drip Irrigation Application:

Apply the suggested rate of this product in multiple applications 10 - 14 days apart throughout the growing season of the crop.
